

**RACE® GLASS WINDOW  
Installation Instructions**

RGP-0036 RGP-0072  
RGP-0048 RGP-0096  
RGP-0060 RGP-0010

1. Remove fabric pads if required.
2. Remove backing paper from double sided tape on one upper channel half ("A") and press firmly into position on vertical surface of upper rail as illustrated.
3. Center the lower channel on beam raceway cover, between centers of upper posts, and pencil a guideline on top of the beam.
4. Remove lower channel. Peel backing paper from double sided tape - reposition lower channel on guideline and press firmly to beam raceway cover.
5. Apply the six (6) bumpers on both sides (three (3) per side) of the window near the top as shown.
6. Remove backing paper from double sided tape on upper channel half ("B") - place plexiglass in lower channel and position vertically against previously installed upper channel half "A". Position upper channel half "B" against upper rail and press firmly together securing the plexiglass between the two (2) upper channel halves "A" and "B".
